

Science in the News Topic

Science in the News is....

Solutions for Global Warming, Evidence that Global Warming is Real, Science & Politics of Global Warming, Population Pressure, Air Pollution, Ozone Concerns, Acid Rain, Water Pollution, Toxic Waste, Fisheries Depletion, Species Extinction, Deforestation, Desertification, Water Shortage and Drought, Health of San Francisco Bay

Stem Cell research, Electric cars, Genetic Engineering, Making Artificial Body Parts, Dangerous Diseases, Mapping the Human Genome, Origins of Life, Asteroids, volcanoes or self-destruction - How will life on earth end? The Mission to Mars, Finding a cure for AIDS, Technology used to make Movies, Oak Disease in Marin, Breast Cancer in Marin, The Space Station, Advances in Computer Technology, Nano-technology, Endangered Species, New Space Discoveries, Earthquakes, Weather and Climate News, Natural Disasters, Aging, Evolution, Science of the Brain, Science of Learning, Health and Nutrition, Obesity, Eating Disorders....

Begin your research at the Miller Creek Projects "Science in the News" Link. Find "Science Daily" to search a thorough list of science in the news topics.

Name the topic of your SCIENCE IN THE NEWS SCRAPBOOK _____

Describe your topic: _____

Why did you select this topic?

Write four questions you hope to find the answer to in your research.

1. _____
2. _____
3. _____
4. _____

How do you know that this is a CURRENT issue in science?

Write accurate bibliography formats for TWO different articles you might use about youru topic. Choose articles from two different sources. Bibliography format info is explained on Science in the News page from the Miller Creek library.

1. _____

2. _____

Agree or disagree or not sure?

- 1. Humans are responsible for warming the earth's climate.**
- 2. Global warming is dangerous to life on earth.**
- 3. Scientists should be able to study unborn embryos for stem cell research.**
- 4. Scientists should develop a system to clone human beings.**
- 5. Hybrid cars are good for the environment, even if though their batteries are dangerous for the environment.**
- 6. There will be a major earthquake in the Bay Area in the next 30 years.**
- 7. We should make fuel out of corn to help solve the world's energy problems.**
- 8. Eating chocolate releases chemicals that are good for your body and brain.**
- 9. Breast cancer rates are higher in Marin than the rest of the nation.**
- 10. Understanding Science is important for being a responsible citizen.**

11.
